

## Change Requests (Do any **six** from the list below)

1. **“Modify the splash window”**. Currently the splash window of jEdit is a static picture. Add the names and emails of your group members to it. And add moving text as the same effect shown in “About jEdit” dialog. Adjust the scrolling speed so that all text can be shown.
2. **“Zoom the text editor”**. Under menu View, add two menu items “zoom+” and “zoom–” to scale the editors. At this stage, the scaling factors are not defined. The view should be able to be scaled multiple times.
3. **“Search and mark all”**. Under menu Search, add menu item “mark all”. Locate all matches and add markers to all of the lines.
4. **“Add timestamps to log”**. Locate where the activity.log is. Currently there are no timestamps in the log file. Add timestamps to all kinds of messages.
5. **“Duplicate data when creating a new view”** Currently clicking View | New View will create a new view for the same data; which means that modification in one view will affect the other one. Add menu item New View&Buffer under menu View to allow the user to duplicate data for the current shown view only.
6. **“Show/Hide whitespace”** Currently jEdit shows a red dot at the end of every line. Newline is the only whitespace symbol that jEdit shows. Add menu item Show/Hide whitespace under menu View to allow the user to choose whether all whitespace symbols (newlines, blanks, and tabs) will be shown. At this stage you do not have to worry about editing of the text with whitespace showing.
7. **“Search list”**. Currently jEdit allows users to access the text that was previously search by pressing page\_up or right-click keys in Search Dialog. Display in a listbox the last 5 text fragments that were previously search.
